

					Key Mineral Deposits and Projects:	Gold, Copper, and Zinc:
Eritrean Mining industry						
	Latitude (x)	Longitude (y)	Altitude	Location	Operators	Current status
Bisha Mine	15.4723° N	37.4769° E	930	Near the village of Bisha, approximately 150 km west of Asmara.	Operator: Initially Nevsun Resources, now controlled by Zijin Mining Group.	Operational since 2011, producing copper and zinc after an initial gold phase.
Projet Asmara , Emba Derho	15.3358° N	38.9305° E	2,350	Emba Derho	Asmara Mining Share Company (Sunridge Gold and Eritrean National Mining Corporation)	Various stages of development and early production.
Projet Asmara , Adi Nefas	15.3448° N	38.9540° E	2,400	Adi Nefas	Asmara Mining Share Company (Sunridge Gold and Eritrean National Mining Corporation)	Various stages of development and early production.
Projet Asmara , Debarwa	15.0159° N	38.8270° E	1,970	Debarwa.	Asmara Mining Share Company (Sunridge Gold and Eritrean National Mining Corporation)	Various stages of development and early production.
Zara Gold Project	15.3277° N	37.6683° E	1,200	Near the village of Zara, approximately 160 km northwest of Asmara.	Operator: Zara Mining Share Company (SFECO Group and Eritrean National Mining Corporation).	Operational, producing gold.
Colluli Potash Project	13.9022° N	40.1879° E	-75	Danakil Depression, approximately 180 km southeast of Asmara.	Operator: Colluli Mining Share Company (Danakali Limited and Eritrean National Mining Corporation).	In development, aiming for significant potash production.
Salt Mining:						
Lake Assal:	15.3658° N	39.4583° E	-155	Near the town of Massawa.	Eritrean National Mining Corporation	Operational, producing significant quantities of salt.
Danakil Depression:	13.9022° N	40.1879° E	-75	Near the Colluli Potash Project.	Eritrean National Mining Corporation	Salt extraction ongoing alongside potash development.
					3. Future Potential Mining Sites:	
Adobha Peninsula:	16.2187° N	38.2048° E	400			Exploration stage: Gold, base metals.
Gash-Barka Region			1,000 to 1,500	Various exploration sites within the region	Several exploration projects underway.	Potential : Gold, copper, zinc.
Northern Red Sea Region			200	Various exploration sites within the region	Several exploration projects underway.	Early exploration. Potash, base metals, precious metals.
Fisheries in the Red Sea						
Massawa	15.6092° N	39.4454° E	Sea level	Coastal areas along the Red Sea, including ports such as Massawa		Fisheries are active, with the potential for expansion. Key species include various fish and marine invertebrates.
Assab	13.0091° N	42.7369° E	Sea level	Coastal areas along the Red Sea, including ports such as and Assab.		Fisheries are active, with the potential for expansion. Key species include various fish and marine invertebrates.

ዝርዝር ሓፈሻዊ ትሕዝቶ ናይ ኤርትራ ዕድና ቦታታት

English

Detailed Overview of Eritrea's Mining Sites

1. Overview:

Eritrea's mineral resources are found across diverse geographical locations, each with unique coordinates and elevations.

2. Key Mineral Deposits and Projects:

Gold, Copper, and Zinc:

Bisha Mine:

- ✓ Location: Near the village of Bisha, approximately 150 km west of Asmara.
- ✓ Coordinates:
 - Latitude (x): 15.4723° N
 - Longitude (y): 37.4769° E
 - Elevation (z): 930 meters (3051 feet)
- ✓ Discovery: Late 1990s and early 2000s.
- ✓ Current Status: Operational since 2011, producing copper and zinc after an initial gold phase.
- ✓ Operator: Initially Nevsun Resources, now controlled by Zijin Mining Group.

Asmara Project:

- ✓ Location: Several deposits around Asmara, including Emba Derho, Adi Nefas, and Debarwa.

Emba Derho:

- ✓ Coordinates:
 - Latitude (x): 15.3358° N
 - Longitude (y): 38.9305° E
 - Elevation (z): 2,350 meters (7,710 feet)

Adi Nefas:

- ✓ Coordinates:
 - Latitude (x): 15.3448° N

Date 15-jul-24

- Longitude (y): 38.9540° E
- Elevation (z): 2,400 meters (7,874 feet)

Debarwa:

- ✓ Coordinates:
 - Latitude (x): 15.0159° N
 - Longitude (y): 38.8270° E
 - Elevation (z): 1,970 meters (6,463 feet)
- ✓ Discovery: Early 2000s.
- ✓ Current Status: Various stages of development and early production.
- ✓ Operator: Asmara Mining Share Company (Sunridge Gold and Eritrean National Mining Corporation).

Zara Gold Project:

- ✓ Location: Near the village of Zara, approximately 160 km northwest of Asmara.
- ✓ Coordinates:
 - Latitude (x): 15.3277° N
 - Longitude (y): 37.6683° E
 - Elevation (z): 1,200 meters (3,937 feet)
- ✓ Discovery: Early 2000s.
- ✓ Current Status: Operational, producing gold.
- ✓ Operator: Zara Mining Share Company (SFECO Group and Eritrean National Mining Corporation).

Potash:

Colluli Potash Project:

- ✓ Location: Danakil Depression, approximately 180 km southeast of Asmara.
- ✓ Coordinates:
 - Latitude (x): 13.9022° N
 - Longitude (y): 40.1879° E
 - Elevation (z): -75 meters (-246 feet) (below sea level)
- ✓ Discovery: Initial exploration in the early 1900s, with renewed interest in the 2000s.
- ✓ Current Status: In development, aiming for significant potash production.

Date 15-jul-24

- ✓ Operator: Colluli Mining Share Company (Danakali Limited and Eritrean National Mining Corporation).

3. Future Potential Mining Sites:

Adobha Peninsula:

- ✓ Potential Minerals: Gold, base metals.
- ✓ Coordinates:
 - Latitude (x): 16.2187° N
 - Longitude (y): 38.2048° E
 - Elevation (z): 400 meters (1,312 feet)
- ✓ Current Status: Exploration stage.

Gash-Barka Region:

- ✓ Potential Minerals: Gold, copper, zinc.
- ✓ Coordinates: Various exploration sites within the region.
- ✓ Elevation: Approximately 1,000 to 1,500 meters (3,280 to 4,921 feet)
- ✓ Current Status: Several exploration projects underway.

Northern Red Sea Region:

- ✓ Potential Minerals: Potash, base metals, precious metals.
- ✓ Coordinates: Various exploration sites along the coastline.
- ✓ Elevation: Sea level to 200 meters (656 feet)
- ✓ Current Status: Early exploration.

4. Other Resources:

Diamonds:

- ✓ Location: No significant diamond mining activity has been confirmed in Eritrea. The geological settings are not typically conducive to diamond formation.
- ✓ Future Potential: Limited potential based on current geological surveys.

Salt Mining:

Lake Assal:

- ✓ Location: Near the town of Massawa.

Date 15-jul-24

- ✓ Coordinates:
 - Latitude (x): 15.3658° N
 - Longitude (y): 39.4583° E
 - Elevation (z): -155 meters (-508 feet) (below sea level)
- ✓ Current Status: Operational, producing significant quantities of salt.

Danakil Depression:

- ✓ Location: Near the Colluli Potash Project.
- ✓ Coordinates:
 - Latitude (x): 13.9022° N
 - Longitude (y): 40.1879° E
 - Elevation (z): -75 meters (-246 feet) (below sea level)
- ✓ Current Status: Salt extraction ongoing alongside potash development.

Fisheries in the Red Sea:

Location: Coastal areas along the Red Sea, including ports such as Massawa and Assab.

- ✓ Massawa:
- ✓ Coordinates:
 - Latitude (x): 15.6092° N
 - Longitude (y): 39.4454° E
 - Elevation (z): Sea level

Assab:

- ✓ Coordinates:
 - Latitude (x): 13.0091° N
 - Longitude (y): 42.7369° E
 - Elevation (z): Sea level
- ✓ Current Status: Fisheries are active, with the potential for expansion. Key species include various fish and marine invertebrates.
- ✓ Future Potential: Development of sustainable fisheries and aquaculture can boost economic growth and food security.

5. Economic Impact and Challenges:

The mining sector is crucial for Eritrea's economy, providing employment and revenue. However, challenges such as political instability, lack of infrastructure, and regulatory issues can impede progress.

Conclusion:

Eritrea's rich mineral resources offer significant economic potential. Continued exploration and development, coupled with stable governance and infrastructure improvement, could enhance the country's prosperity. The focus should remain on sustainable practices to ensure long-term benefits for the local population.

French

Aperçu détaillé des sites miniers en Érythrée

1. Aperçu:

Les ressources minérales de l'Érythrée sont dispersées à travers divers emplacements géographiques, chacun ayant des coordonnées et des altitudes uniques.

2. Principaux gisements et projets miniers :

Or, cuivre et zinc:

Mine de Bisha:

- ✓ Emplacement: Près du village de Bisha, à environ 150 km à l'ouest d'Asmara.
- ✓ Coordonnées:
 - Latitude (x): 15.4723° N
 - Longitude (y): 37.4769° E
 - Altitude (z): 930 mètres
- ✓ Découverte: Fin des années 1990 et début des années 2000.
- ✓ Statut actuel: En exploitation depuis 2011, produisant du cuivre et du zinc après une phase initiale d'or.
- ✓ Opérateur: Initialement Nevsun Resources, maintenant contrôlé par Zijin Mining Group.

Date 15-jul-24

Projet Asmara:

Emplacement: Plusieurs gisements autour d'Asmara, y compris Emba Derho, Adi Nefas et Debarwa.

Emba Derho:

- ✓ Coordonnées:
 - Latitude (x): 15.3358° N
 - Longitude (y): 38.9305° E
 - Altitude (z): 2 350 mètres

Adi Nefas:

- ✓ Coordonnées :
 - Latitude (x): 15.3448° N
 - Longitude (y): 38.9540° E
 - Altitude (z): 2 400 mètres

Debarwa:

- ✓ Coordonnées :
 - Latitude (x): 15.0159° N
 - Longitude (y): 38.8270° E
 - Altitude (z): 1 970 mètres
- ✓ Découverte: Début des années 2000.
- ✓ Statut actuel: Divers stades de développement et de production précoce.
- ✓ Opérateur: Asmara Mining Share Company (Sunridge Gold et la Société Nationale des Mines de l'Érythrée).

Projet aurifère de Zara:

Emplacement: Près du village de Zara, à environ 160 km au nord-ouest d'Asmara.

- ✓ Coordonnées:
 - Latitude (x): 15.3277° N
 - Longitude (y): 37.6683° E
 - Altitude (z): 1 200 mètres
- ✓ Découverte: Début des années 2000.

Date 15-jul-24

- ✓ Statut actuel: En exploitation, produisant de l'or.
- ✓ Opérateur: Zara Mining Share Company (SFECO Group et la Société Nationale des Mines de l'Érythrée).

Potasse:

Projet de potasse de Colluli:

- ✓ Emplacement: Dépression du Danakil, à environ 180 km au sud-est d'Asmara.
- ✓ Coordonnées:
 - Latitude (x): 13.9022° N
 - Longitude (y): 40.1879° E
 - Altitude (z): -75 mètres (sous le niveau de la mer)
- ✓ Découverte: Exploration initiale au début des années 1900, avec un regain d'intérêt dans les années 2000.
- ✓ Statut actuel: En développement, visant une production significative de potasse.
- ✓ Opérateur: Colluli Mining Share Company (Danakali Limited et la Société Nationale des Mines de l'Érythrée).

3. Sites potentiels de futures exploitations minières :

Péninsule d'Adobha:

- ✓ Minéraux potentiels: Or, métaux de base.
- ✓ Coordonnées:
 - Latitude (x): 16.2187° N
 - Longitude (y): 38.2048° E
 - Altitude (z): 400 mètres
- ✓ Statut actuel: Stade d'exploration.

Région de Gash-Barka:

- ✓ Minéraux potentiels: Or, cuivre, et zinc.
- ✓ Coordonnées: Divers sites d'exploration dans la région.
- ✓ Altitude: Environ 1 000 à 1 500 mètres
- ✓ Statut actuel: Plusieurs projets d'exploration en cours.

Région de la mer Rouge septentrionale:

Minéraux potentiels: Potasse, métaux de base, métaux précieux.

- ✓ Coordonnées: Divers sites d'exploration le long de la côte.
- ✓ Altitude: Niveau de la mer à 200 mètres
- ✓ Statut actuel: Exploration précoce.

4. Autres ressources :

Diamants :

- ✓ Emplacement: Aucune activité minière de diamants significative n'a été confirmée en Érythrée. Les contextes géologiques ne sont généralement pas propices à la formation de diamants.
- ✓ Potentiel futur: Potentiel limité basé sur les relevés géologiques actuels.

Exploitation du sel:

Lac Assal:

Emplacement: Près de la ville de Massawa.

- ✓ Coordonnées:
 - Latitude (x): 15.3658° N
 - Longitude (y): 39.4583° E
 - Altitude (z): -155 mètres (sous le niveau de la mer)
- ✓ Statut actuel: En exploitation, produisant des quantités significatives de sel.

Dépression du Danakil:

- ✓ Emplacement: Près du projet de potasse de Colluli.
- ✓ Coordonnées:
 - Latitude (x): 13.9022° N
 - Longitude (y): 40.1879° E
 - Altitude (z): -75 mètres (sous le niveau de la mer)
- ✓ Statut actuel: Extraction de sel en cours parallèlement au développement de la potasse.

Pêcheries de la mer Rouge:

Emplacement: Zones côtières le long de la mer Rouge, y compris les ports de Massawa et Assab.

Massawa:

- ✓ Coordonnées :
 - Latitude (x): 15.6092° N
 - Longitude (y): 39.4454° E
 - Altitude (z): Niveau de la mer

Assab:

- ✓ Coordonnées:
 - Latitude (x): 13.0091° N
 - Longitude (y): 42.7369° E
 - Altitude (z): Niveau de la mer

Statut actuel: Les pêcheries sont actives, avec un potentiel d'expansion. Les espèces clés comprennent divers poissons et invertébrés marins.

Potentiel futur: Le développement de pêcheries durables et d'aquaculture peut stimuler la croissance économique et la sécurité alimentaire.

5. Impact économique et défis:

Le secteur minier est crucial pour l'économie de l'Érythrée, fournissant emplois et revenus. Cependant, des défis tels que l'instabilité politique, le manque d'infrastructures et les problèmes réglementaires peuvent entraver les progrès.

Conclusion:

Les riches ressources minérales de l'Érythrée offrent un potentiel économique significatif. La poursuite de l'exploration et du développement, associée à une gouvernance stable et à l'amélioration des infrastructures, pourrait améliorer la prospérité du pays. L'accent doit rester sur des pratiques durables pour garantir des avantages à long terme pour la population locale.
